

# - Box Station -

Box Station is the club's latest 2mm scale exhibition project. The original station was on the main Great Western Railway main line between London and Bristol and was opened for traffic when the Chippenham to Bath section came into service in June 1841. The station remained in use until January 1965.

The layout runs from Middle Hill tunnel in the east to the first bridge to the west of the station and it will feature rolling stock from the early 1900s up until its closure in 1965.

More details on the layout can be found at [srmg.org.uk/box-station](http://srmg.org.uk/box-station)
